A Word

About Domestic Grown Tulip Bulbs

It is with more than the usual satisfaction that this catalog is presented to you. Not only does it offer you a much larger variety of choice tulips, but the bulbs this year are the finest I have ever seen. Soil and weather conditions have seemed to be ideal for producing the kind of bulbs that will bring joy to the heart of every flower lover. It makes me very happy, indeed, to be able to offer such a wonderful selection of choice bulbs.

Nelis Tulips are American grown. They are produced in a soil and climate that make them perfectly acclimated to domestic cultivation. They need not be pampered—just give them ordinary care and they will reward you handsomely.

Nelis Nurseries are the largest growers of Tulips in Michigan. We are also intimately associated with the Tulip industry of the Netherlands. And so it is with full knowledge and authority that we recommend **domestic** grown Tulips. They are easier to grow, cheaper to buy, and once you have seen their marvelous blooms you will understand why we favor them so highly over the imported bulbs. The most complete selection of choice and staple varieties is listed for you in this catalog.

You are urged to get your order in early while the choicest bulbs are available; orders are filled in rotation as received.

Our Guarantee

We guarantee every bulb we ship out to be strictly top size (with the exception of our Tulip City Collection which is a trifle smaller in size than top size bulbs) and to be absolutely true to name. We further guarantee every bulb, root or plant to grow and bloom and we will replace bulbs, roots or plants free of charge if found otherwise.

How We Do Business

All orders of \$2.00 or more will be shipped fully prepaid if cash is included with order. Smaller orders must include an additional charge of 10c to cover transportation.

CHARGE ACCOUNTS. As our business is spread over the whole country, no charge accounts will be accepted unless customer is well known to us and credit has been established.

We supply 6 of one variety at the dozen rate; 25 of one variety at the 100 rate; 250 of one variety at the 1000 rate.

Prices in this catalog supersede all previous catalogs.

Giant Darwin Tulips

MAY-FLOWERING

These Tulips have created a real sensation for the past few years and one really does not wonder when seeing them in full bloom. They received their reputation through merit alone. They are most brilliant, and vary in color from black to white, crimson and scarlet to the softest pink, purple to lilac, and indescribable intermediate blendings and pastel shades. Yellow is the only scarce color, but this color can be supplied from the Cottage varieties listed on the following pages.

The number after the variety indicates the height at blooming time.

Nelis Cottage Tulips

MAY-FLOWERING

The Cottage Tulips, like the Darwins, flower in May. The difference between the Cottage Tulips and the Darwins is in the shape of the blossoms, which is long and oval, many of them with gracefully reflexed petals. The classes which are the most outstanding are the delicate and artistic shades of pink, yellow, orange, salmon, fawn, amber and old rose. They are ideally suited for outdoor planting and cutting.

A Rare Bargain in May-Flowering Tulip Bulbs

These bulbs are of special home garden grade, all fine named varieties of flowering size for outdoor and mass planting. These are the same size bulbs of which we have supplied millions for the City of Holland, Michigan. We do not recommend this size for forcing and they are smaller than the bulbs listed on other pages of this catalog. We recommend them as a real bargain and can supply them in the following varieties:

Baronne de la Tonnaye. Bright rose.
(Darwin).

Bronze Queen. Golden bronze.
(Breeder).

Clara Butt. Salmon-pink. (Darwin).

Inglescombe Yellow. Yellow. (Cottage).

GOLDEN YELLOW PAPER-WHITE NARCISSI

Soleil d'Or resembles the Paper-White Narcissus very much in habit, but of an exquisite deep yellow color, with an orange-yellow cup.

Grow in shallow bowls of water with enough pebbles, stones or soil to prevent them from toppling over when in bloom. Will bloom from 4 to 6 weeks after planting. Exhibition size bulbs only. \$2.00 per doz.; \$15.00 per 100.

Narcissi or Daffodils

In order to have a beautiful bulb garden, Narcissi should be planted very freely. They thrive in practically any climate in the United States. They are not only excellent for outdoors, but millions are used every year for forcing indoors. Their graceful form, beautifully shaped trumpets and cups, and the long, straight stems have made them favorites for cut flower purposes with every American gardener. We have compiled a list (as short as possible) of the best and most attractive varieties for indoor exhibition purposes, and it is complete and easy to select from.

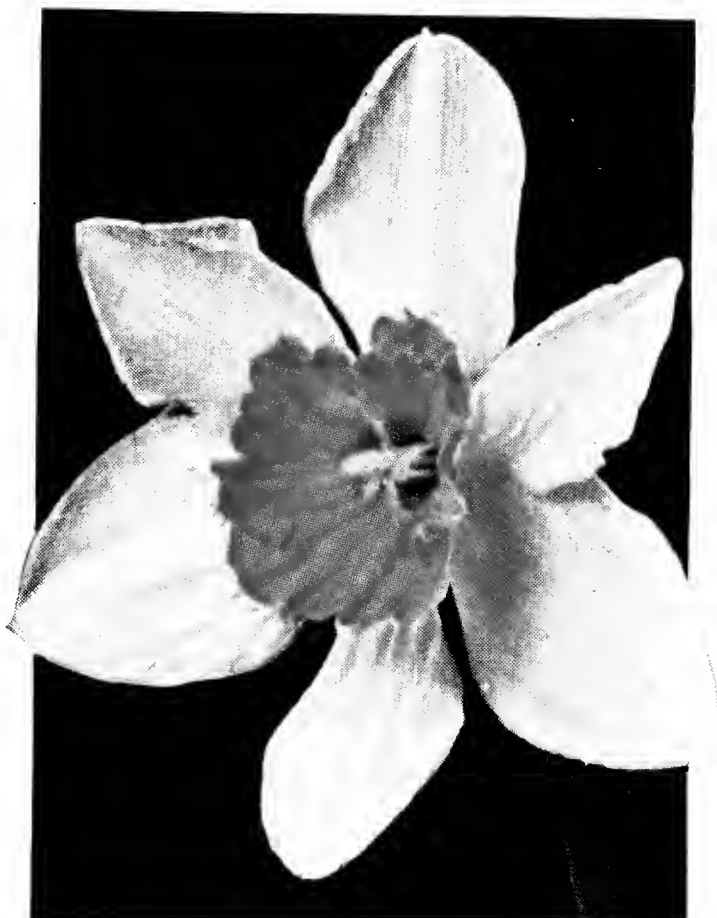

Culture Outdoors. They should be planted so that the tops of the bulbs are at least 5 inches beneath the soil. A little protection should be given during severe winter weather, although they are perfectly hardy.

In our descriptions we use the following terms: **Perianth**—the outer petals of the flower. **Trumpet**—the long cup or trumpet-shaped center. **Crown or Cup**—the short or flat center.

DAFFODILS for NATURALIZING

Suitable for woodland planting, cutting or garden display.

Practically any soil has been found suitable and they grow equally well in the open as among trees and in woodland.

Containing a mixture of large trumpets, Leedsii, Barri and Poeticus types, making a mixture that cannot be beaten for value and worth much more than we charge for them. Plant at least 8 inches deep but avoid places where water may collect at any time, as they like drainage,

Try to plant them before October 15th or shortly thereafter, but place your order early as the demand is increasing for these bulbs at this special low price we have adopted, and we cannot take orders for less than 100 bulbs.

Price, \$3.50 per 100; \$30.00 per 1000

Miniature Flowering Bulbs for the Rock Garden

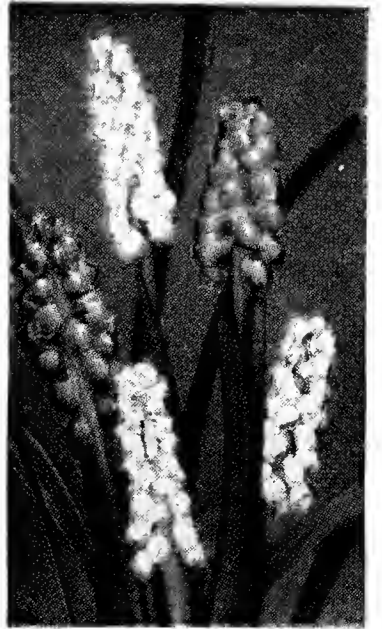

ERANTHIS

(Winter Aconite)

Early in spring the golden yellow buttercup-like flowers look charming, resting on an emerald-green cushion of leaves forming a striking contrast to the Snowdrops and Scillas. The foliage remains long after the flowers. Especially valuable in moist situations under trees and in the rock garden. Height 6 inches. 40c per doz.; \$3.00 per 100.

FRITILLARIA MELEAGRIS

Dwarf spring flowering plants bearing large, bell-shaped flowers of various colors. Yellow, white, black, purple, striped and splashed. They are invaluable for pot culture and when grown in large groups in the rock garden, require a dry situation. Height 10 inches. 50c per doz.; \$3.50 per 100.

Muscari.

Snowdrops.

CHIONODOXA

(Glory-of-the-Snow)

An early flowering spring bulb for borders or rockery. Produces flower spikes bearing 10 to 15 Scilla-like flowers. Perfectly hardy and should be planted close together for effect. Height 7 inches.

LUCILIAE. Deep blue with a white center. 40c per doz.; \$3.00 per 100.

SNOWDROPS

(Galanthus)

Everybody knows the Snowdrop, with its little white bells coming through the snow very early in the spring. Especially attractive if planted with Scilla. Height 5 inches. 50c per doz.; \$3.50 per 100.

MUSCARI

(Grape Hyacinth)

The foliage of this plant is very similar to that of Scilla but the flowers are of entirely different form—grapelike clusters closely set, and are wonderful cut flowers, splendid for naturalizing. Height 15 inches.

Japanese Iris

This queen of the large flowering Iris is very effective and flowers later than the German Iris. The flowers are of enormous size and with single and double varieties, both being equally attractive and suitable for cut flowers. They develop into a more perfect bloom if cut just before the bud opens and placed in the house in fresh water. The best time to plant these Iris is in the fall, to allow them to make new roots before winter sets in.

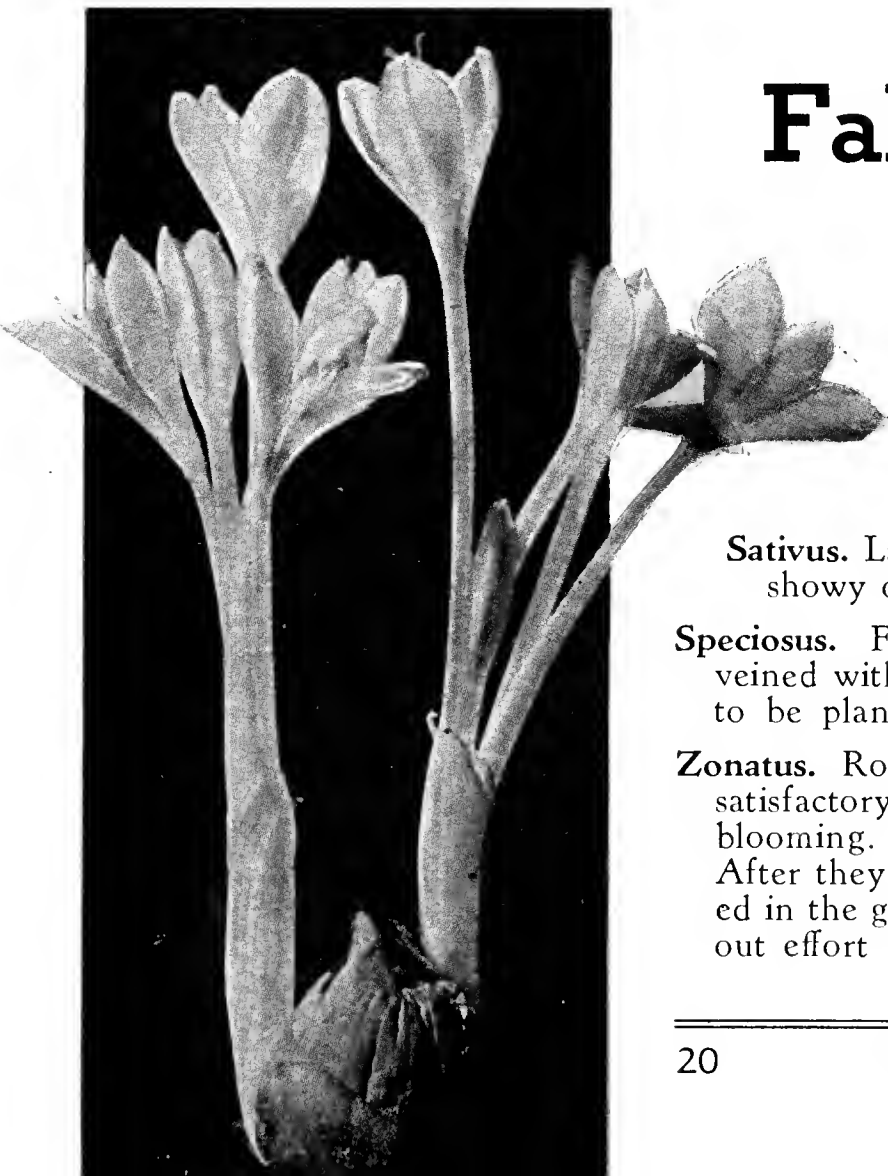

Japanese Iris.
